## Problem K. Fake Plastic Trees 2

| Input file: | standard input |
| :--- | :--- |
| Output file: | standard output |
| Time limit: | 3 seconds |
| Memory limit: | 1024 mebibytes |

You are given a tree with $N$ vertices numbered from 1 to $N$. The tree is vertex-weighted. In other words, each vertex of the tree is assigned a nonnegative integer weight.

We will delete some edges from the tree. After the deletion, for each connected component, the sum of vertex weights should be in the range $[L, R]$.
For all integers $0 \leq i \leq K$, determine if we can achieve this goal by deleting exactly $i$ edges.

## Input

The first line contains a single integer $T$, the number of test cases. Then $T$ test cases follow, each following the given specification:

The first line of each test case contains four integers $N, K, L$, and $R(1 \leq N \leq 1000$, $\left.0 \leq K \leq \min (50, N-1), 0 \leq L \leq R \leq 10^{18}\right)$.
The next line contains $N$ integers $A_{1}, A_{2}, \ldots, A_{N}$, where $A_{i}$ denotes the weight of vertex $i\left(0 \leq A_{i} \leq 10^{18}\right)$.
Each of the next $N-1$ lines contains two integers $x$, $y$, denoting the pair of vertices connected by an edge $(1 \leq x, y \leq N, x \neq y)$. It is guaranteed that the given graph is a tree.
For all test cases, the sum of $N$ is at most 1000 .

## Output

For each test case, output a binary string of length $K+1$. The $i$-th character should be ' 1 ' if it is possible to achieve the desired goal by deleting exactly $i-1$ edges. Otherwise, the $i$-th character should be ' 0 '.

## Example

|  |  |  |  |  | standard input |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 3 |  |  |  | 0111 |  |  |
| 4 | 3 | 1 | 2 |  | 0011 |  |
| 1 | 1 | 1 | 1 |  |  |  |
| 1 | 2 |  |  |  |  |  |
| 2 | 3 |  |  |  |  |  |
| 3 | 4 |  |  |  |  |  |
| 4 | 3 | 1 | 2 |  |  |  |
| 1 | 1 | 1 | 1 |  |  |  |
| 1 | 2 |  |  |  |  |  |
| 1 | 3 |  |  |  |  |  |
| 1 | 4 |  |  |  |  |  |
| 4 | 3 | 0 | 0 |  |  |  |
| 1 | 1 | 1 | 1 |  |  |  |
| 1 | 2 |  |  |  |  |  |
| 1 | 3 |  |  |  |  |  |
| 1 | 4 |  |  |  |  |  |
