## Problem F. Flower's Land

## Input file: standard input Output file: standard output <br> Time limit: 8 seconds <br> Memory limit: 2048 mebibytes

The Kingdom of Flowers consists of $n$ cities, and the $i$-th city grows $a_{i}$ flowers. There are $n-1$ roads, where the $i$-th road connects cities $u_{i}$ and $v_{i}$. It is guaranteed that for any two cities there is a path connecting them.

Now, the Kingdom of Flowers wants to hold a flower exhibition. To do that, you need to first choose a city $z$ to build an exhibition hall, and then select exactly $k$ cities $x_{1}, x_{2}, \ldots, x_{k}$ and transport the flowers from those $k$ cities to the city $z$.

To avoid upsetting people in cities along the path, the organizers stipulated that if city $x$ was selected, then all cities on the path from $x$ to $z$ had to be selected as well. In particular, this means that city $z$ must be selected.

For each $z=1,2, \ldots, n$, find the maximum number of flowers that can be transported if city $z$ is chosen to build the exhibition hall.

## Input

The first line of the input contains two integers $n$ and $k(1 \leq n \leq 40000,1 \leq k \leq \min (n, 3000))$.
The next line of the input contains $n$ integers $a_{1}, a_{2}, \ldots, a_{n}\left(1 \leq a_{i} \leq 5 \cdot 10^{5}\right)$.
Each of the next $n-1$ lines contains two integers $x$ and $y(1 \leq x, y \leq n, x \neq y)$, indicating that there is an edge between vertices $x$ and $y$. It is guaranteed that the given graph is a tree.

## Output

Output a single line containing $n$ integers $f_{1}, f_{2}, \ldots, f_{n}$, where $f_{i}$ denotes the answer for $z=i$.

## Examples

| standard input | standard output |
| :---: | :---: |
| $\begin{array}{llllll} 5 & 3 & & & \\ 6 & 10 & 4 & 3 & 4 \\ 3 & 4 & & & \\ 4 & 2 & & & \\ 2 & 5 & & & \\ 5 & 1 & & & \end{array}$ | $20 \quad 20171720$ |
| $\begin{array}{lllllll} \hline 7 & 4 & & & & & \\ 1 & 3 & 2 & 1 & 7 & 12 & 17 \\ 4 & 6 & & & & & \\ 1 & 4 & & & & & \\ 5 & 1 & & & & & \\ 2 & 5 & & & & & \\ 7 & 6 & & & & & \\ 3 & 2 & & & & & \\ \hline \end{array}$ | 31131331213131 |
